

LED DESTINATOR XX ENCOMPASS YOUR DESTINATION XX BEGINS HERE

Transign's Hands-Free control options create a safer environment for public transportation systems, enabling bus operators to have less distraction while giving passengers a safe ride to their destination. With GPS connectivity, our **LED Destinator EnCompass**® signage will change the messages displayed for all interior and exterior signage based on the bus' location, allowing the driver to attend to roads, stops, and on-board passengers. Upgrading to the **LED Destinator EnCompass**® sign system gives your transit agency an affordable solution to improve services, communication, increase ridership, and run more efficiently, maximizing revenue.

SUPERIOR SAFETY, RELIABILITY AND PERFORMANCE

- GPS-based message progression
- Helps eliminate driver distractions and encourages safer driving habits
- Ensures accurate messages
- Provides real-time route information
- Reduces service interruptions caused by equipment failure or human error

IMPROVED COMMUNICATION WITH RIDERS

- Destination/Route information is clear, accurate, and timely
- Synchronize interior messages, next stop announcements & more
- Creates additional opportunities for local advertisement revenue
- Automated Voice Announcement, Passenger Counting, GPS/AVL Tracking, and Driver Time/Schedule Management also available

SMART, EFFICIENT AND ACCURATE ROUTE MANAGEMENT

Our **LED Destinator EnCompass**® system is configurable via a secure web interface with pre-set routes, interest points, and landmarks, allowing you to display custom messages at each desired trigger point. For greatest efficiency, route updates are applied automatically to each device wirelessly at chosen intervals. The optional 3G/cellular dispatch system can remotely assign message updates, detours, and stop changes, and can provide instant communication between drivers and dispatch operations.

SIGI

YOUR DESTINATION BEGINS HERE

In 2009, the American Public Transportation Association (APTA) put a high priority on minimizing driver distractions and interruptions caused by electronic equipment (visit www.apta.com/resources/standards for more information). In pursuit of this goal, Transign makes the most affordable and effective hands-free solution available, suitable for all fixed-route fleets, both large and small.

COMMITTED TO EXCELLENCE

Established in 1959, Transign is a leading provider of high-quality signage for the transit industry. We remain committed to providing world-class U.S. based customer service and technical support.

LED DESTINATOR® LIFETIME WARRANTY

With a warranty that outlasts the life of most vehicles (100,000 hours at full brightness), our signs will exceed expectations in reliability and performance.

LED DESTINATOR * LENCOMPASS
